	SOIL CONDITIONING	NUTRITION						
PRODUCT	REVITALIZE + GROMATE	AGRODEX BORON	FULFIL	CALMATE	AGRODEX CAB	BEYOND FOLIAR 3-10-15	AGRODEX ZN	KICKSTART BIO 25
APPLICATION RATES	2.5L/HA 10L/HA	1L/HA	1L/HA	5L/HA	3.5L/HA	10L/HA	750ML- 1½ L/HA	10L/HA
GROWTH STAGE								
TREE PLANTING	✓			APPLY WITH CALCIUM OR POTASSIUM NITRATE THROUGH IRRIGATION. MAXIMUM 20L/HA PER SEASON				
SPRING FLUSH		✓						
4 WEEKS PRE BLOOM	✓						✓	
FLOWERING			✓		✓		✓	
NUT SET			✓				✓	
NUT FILLING					✓	✓ ✓		
POST HARVEST								✓

✓ Shows application of product and timing

✓ ✓ Shows two applications of product during this growth period.

The AgroBest Macadamia crop program is a flexible nutrition program designed to increase yield and quality.

A wide range of trace elements including, Calcium, Zinc and Boron are available for strategic application. These are all produced using the unique AMCA System which guarantees very high uptake and plant availability. The program includes FulFil, a unique formulation of natural growth promotants which, has proven to substantially increase flowering and yield.

Frequent applications of Calcium are recommended to maximise yield potential and quality. We recommend AgroDex Ca Plus Boron for high uptake foliar Calcium. The product has Boron and Nitrogen for increased efficiency.

For maintenance of NPK levels we recommend Beyond Foliar 3-10-15, which has very high-grade raw materials combined with a range of micronutrients.

To ripen and fill the crop we have included AgroDex K35, a nitrate and chloride free Potassium product with organic acids and natural plant regulators. Being nitrate free, K35 will not produce the leaf flush associated with some similar products. For ease of application AgroBest products are compatible with many insecticides, herbicides and fungicides.

AgroBest Australia recommends that regular soil and plant tissue analysis be carried out for maintenance of correct nutritional levels.

## NOTES

- Agrobest foliar fertilizers should be used in conjunction with a regular soil fertilizer program.
- Beyond Foliar 3-10-15 contains trace elements for a balanced foliar spray.
- Monitor nutrient status through tissue analysis, and adjust timing and application of plant food accordingly.

This program is designed to augment a soil fertility program and is offered as a guide only and dependent on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Monitor nutrient status through tissue and soil analysis.
