The AgroBest Organic olive program combines Revitalize, which is a microbial soil activator with other organic products.

Fish Emulsion is used to provide basic nutrition and FulFil to stimulate flowering and fruit set. CarboCal is an organically registered product for supply of Calcium. The product is a unique blend of Calcium with a wide range of organic and amino acids. CarboCal can be applied either as a foliar spray or through irrigation to the root zone. CarboCal can assist with cell wall strength and disease control.

For control of Scale and Lace Wing Bug we recommend Natrasoap and Spraytech Oil. All products listed in this program carry BFA organic registration.

AgroBest Australia recommends that regular soil and plant tissue analysis be carried out for maintenance of correct nutritional levels.

**NOTES**

- Monitor nutrient status through tissue analysis.

This program is designed to augment a soil fertility program and is offered as a guide only and dependent on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Monitor nutrient status through tissue and soil analysis.
