8 WEEKS		✓	✓
14 WEEKS		✓	✓

✓ Shows application of product and timing      ✓✓ Shows two applications of product during this growth period.

The AgroBest Tea Tree Crop Program begins with our unique soil stimulant Revitalize, which contains a range of microbial agents, stimulants, bacteria & enzymes.

Revitalize is used with our revolutionary humic acid, Gromate which contains various root and soil stimulants along with proteins, which feed the microbes as they colonise. Nutritional recommendations include Micronutrients and a balanced NPK.

For maintenance of NPK levels we recommend Plant Food 13-7-11, which has very high-grade raw materials for the supply of macro nutrients.

For ease of application AgroBest products are compatible with many insecticides, herbicides and fungicides.

This program is designed to augment a soil fertility program and is offered as a guide only and dependent on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Monitor nutrient status through tissue and soil analysis.
