

AGRO N42

DESCRIPTION

Agro N42 is a high analysis liquid nitrogen fertilizer (42%W/V) for the correction of deficiencies and maintenance growth in all crops with high nitrogen demands. Agro N42 will stimulate fast and vigorous vegetative growth, early and mid season. Agro N42 contains 5% organic and amino acids.

PRODUCT FEATURES

- Agro N42 is a high analysis source offering nitrogen in several differing forms for optimum plant uptake and utilization.
- Agro N42 contains organic and amino acids to assist plant health, particularly translocation of trace elements, which aids photosynthesis and enhances cell division and elongation.

APPLICATION RATES

USE	PRODUCT	WATER	APPLICATION
Wheat/Sugar Cane Vines	3-5 L/Ha		Commence 2 weeks after bloom or as required to correct deficiencies.
Turf/Pasture	4-6 L/Ha 40-60ml/100m ²	250-1000L/Ha	Use as required to correct deficiencies. Water in with sufficient quantities of water.
Stonefruit, Citrus/ Pome	3-4 L/Ha		Commence two weeks after bloom or as required. Caution: Multiple applications on citrus may be damaging.
Vegetables,/ Potatoes	3-4 L/Ha 5-6 L/Ha	500mL-1L Product/100L Water (*minimum)	Commence at early growth every 7-14 days or as required.
Strawberries	2-3 L/Ha	(Less than 1%)	Commence after transplant, every 7 to 14 days before flowering.
Cotton	12-18 L/Ha		Use as required to correct deficiencies.

APPLICATION

Agro N42 can be applied by spray application or through fertigation systems. Foliar application by ground rig or aircraft will require sufficient water to give good coverage. Note that the application rates are a guideline only and can vary depending on crop, soil type, level of nutrient deficiency etc.

ANALYSIS

Nitrogen	42 % w/v
Organic Acids	5 % w/v

OTHER APPLICATION

Agro N42 may be mixed with most liquid fertilizers or pesticides. Always check for compatibility prior to tank mixing.

Keep out of reach of children.

Shake well before use.

SIZES

Agro N42 is available in four sizes:

5 Litre, 20 Litre, 200 Litre, 1000 Litre
