

GROMATE

DESCRIPTION

GroMate is a high purity humic acid solution extracted from leonardite and fermented whey, starch and sugars. This process is designed to produce a balance of humic, polypeptides, free amino acids and organic acids (lactic & citric).

PRODUCT FEATURES

- GroMate is formulated to promote early root development assist in increased production potential.
- GroMate and beneficial microbiology
- GroMate contains natural growth hormones and beneficial microbiology that promotes strong healthy plant growth.

APPLICATION RATES

CROP	PRODUCT l/ha	GROWTH PERIOD	COMMENTS
Vegetable Crops	10L/Ha	Full Bloom onwards	Apply 10-14 days apart. Use in conjunction with NPK and Trace Element fertilizers for increased uptake.
Potatoes	10L/Ha	Full Bloom onwards	For early plant establishment & root development.
Cucurbits	10L/Ha	Flowering	Ideal for addition to fertigation programs.
Grape Vines	10L/Ha	Spring & Autumn	Root flush to break dormancy in spring and additional stored energy prior to dormancy in autumn.
Soil Organic Matter <2.5%	10-20L	Early Growth	Additional soil microbiology in low organic matter soils.
Organic Production	10L	Plant—6 Weeks	Promote early development

GroMate can be applied by side dress and banding equipment, water run through irrigation systems or sprayed directly on soils with other fertilizers.

APPLICATION

All AgroBest nutrition products should be applied in conjunction with a specific nutrition program recommended by an AgroBest Consultant based on a soil/sap analysis.

- Rates can vary by crop, soil type, nutrient deficiency and other factors.
- Product may be soil applied using irrigation system via trickle, dripper or mini sprinkler.

ANALYSIS

ELEMENT	W/W
Humic Acids	8%
Carboxylic Acids	3%
Amino Acids	10%

OTHER APPLICATION

This product may be mixed with most fertilizers and pesticides. Always check compatibility before tank mixing. Ensure all product labels are read carefully.
