

EXTRA CAL

DESCRIPTION

Extra Cal is a foliar applied, bio-available calcium (6%) combined with a cytokinin carrier. Extra Cal's proven ability to translocate calcium efficiently through the plant and into the fruit, resulting in stronger and healthier plant growth, more resistant to disease and larger, better quality fruit with increased shelf life.

PRODUCT FEATURES

Extra Cal mobilises calcium through the plant directly into the fruit. Extra Cal alone at higher rates will provide additional plant systemic resistance to disease attack and when used in conjunction with fungicides, has demonstrated enhanced performance of pest management chemicals.

APPLICATION

Extra Cal should be applied by aerial or spray application in sufficient water to give coverage of the leaves and fruit of the plant. Use of AgroBest's Spraytech Oil Multi Purpose Spray adjuvant will improve rain fastness and uptake into the plant. Note that the application rates are a guideline only.

APPLICATION RATES

USE	PRODUCT RATE	COMMENT
Vegetables	3-5 Litres/Hectare	7-10 days, 3-5 applications
Strawberries	3-5 Litres/Hectare	7-10 days, 3-8 applications
Tree Crops	3-6 Litres/Hectare	7-10 days, 3-6 applications
Grapes	3-6 Litres/Hectare	7-10 days, 3-6 applications
IPM Programs	6-10 Litres/Hectare	7-10 days, 3-6 applications
Water Rate	600ml-1L/100 Litres	

ANALYSIS

ELEMENT	W/V
Calcium	10.00 %
Boron	0.50 %
Nitrogen	6.00 %
Organic Acids	5.00 %

OTHER APPLICATION

Application rates can vary depending on crop, soil type, level of nutrient deficiency etc. Extra Cal may be mixed with water and most liquid fertilizers and pesticides. A check for compatibility prior to tank mixing is recommended.

SIZES

Extra Cal is available in four sizes:

5 Litre, 20 Litre, 200 Litre, 1000 Litre
