

SEAFIL

DESCRIPTION

Seafil is an essential bio-stimulant derived from concentrated seaweed extract, specifically formulated to enhance the utilisation of more than eighty naturally occurring minerals, amino acids and growth hormones.

PRODUCT FEATURES

The unique fermentation process utilises specific microorganisms to enhance assimilation and mobilization throughout the plant tissues by reducing molecular size as well as producing natural chelating acids.

The secret fermentation process increases the activity of the natural plant growth promotants as well as improving physical compatibilities.

FUNCTION

Increased plant levels of Betains, Cytokinins, Gibberellins and Auxins will promote flowering, increase brix levels, improve disease resistance and contribute to general plant health and vigour.

APPLICATION RATES

USE	PRODUCT
Soil	4-6 L/Ha
Foliar	2-5 L/Ha
Seed Treatment (organic)	4 L/T
Stock Supplement	10-15 mL/Day

APPLICATION

All AgroBest nutrition products should be applied in conjunction with a specific nutrition program recommended by an AgroBest Consultant based on a soil/sap analysis.

ANALYSIS

ELEMENT	W/W
Seaweed extract concentrate	10%

OTHER APPLICATION

Seafil can be mixed with water and most liquid fertilizers or pesticides.

SIZES

Seafil is available in four sizes:

1 Litre, 5 Litre, 20 Litre, 200 Litre
