

# PLANTATION STARTER

## DESCRIPTION

Plantation Starter is specifically formulated to improve the establishment and early growth of seedlings and planted tubestock. Plantation Starter is a concentrated blend of soil conditioners, essential trace minerals and micronutrients, combined with natural growth promotants, to ensure excellent early growth.

Plantation Starter also has an organic fertilizer base and, together with soil conditioners, promotes establishment of a healthy root system and improved soil structure and nutrient uptake throughout the season giving increased production.

Established plantations will benefit from annual applications in early spring

## PRODUCT FEATURES

- Plantation Starter is a microbial soil activator containing enzymes, fungi and bacteria to activate natural soil bioflora, improving soil structure and improving nutrient uptake.
- Plantation Starter contains a range of essential organically chelated trace elements.
- Plantation Starter contains natural plant promotants that stimulate root and tree development resulting in faster growth and increased production.

## APPLICATION RATES

USE	PRODUCT	APPLICATION METHODS
General use Established trees	10 L/Ha ( @ 500 trees/ Ha)	Two applications annually 30 days apart early spring Apply by irrigation system to root zone. Water in with 12 mm rain equivalent.
Trees larger rootstock at planting	20 ml per seedling (500 trees/Ha)	Add to watering system when watering in at or after planting.
Seedling tray/ tubestock at nursery	2ml / seedling	Apply in water at 10lt per 100lt of water over trays or tubestock.

## ANALYSIS

Element	Quantity
Humic & organic acids	25 %
Zinc	0.21 %
Iron	0.19 %
Copper	255 mg/l
Manganese	510 mg/l
Boron	390 mg/l
Molybdenum	45 mg/l
Cobalt	40 mg/l
Sulphur	0.23 %

## OTHER APPLICATION

Plantation Starter can be mixed with water and most liquid fertilizers. Avoid extremely alkaline or acidic solutions.

## SIZES

Plantation Starter is available in four sizes:  
5 Litre, 20 Litre, 200 Litre, 1000 Litre
