

# AGROVAM

## DESCRIPTION

Agro-Vam is for the biological inoculation of trees, shrubs, vegetables and grasses with a root colonizing fungi, which will improve root development and plant uptake of water and nutrients, increasing growth and yield.

## PRODUCT FEATURES

Agro-Vam extends plant root systems naturally for:

- Improved water uptake.
- Improved nutrient uptake, particularly with phosphorus.
- Improved drought tolerance.
- Increased plant vigour and growth.
- Increased fruiting and production.

## FUNCTIONS

The thin filaments absorb water and nutrients from the soil and deliver them to the plant. In return the plant provides essential sugars and other nutrients to the fungus. VAM excrete compounds to stimulate the plant to produce additional roots on which the fungi can grow.

VAM forms an extensive filament system within the soil that is many times larger than the plants root system, increasing nutrient and water supply to the plant.

## APPLICATION ,

As with any powder product it is advisable to wear gloves and goggles when handling this product. Generally avoid contact with skin. If contact does occur, wash thoroughly with soap and water.

If ingested drink plenty of water. Do not induce vomiting. If the product comes in contact with the eyes, flush well with water. If any symptoms arise, consult your physician.

## APPLICATION RATES

USE	PRODUCT	APPLICATION
Fruit Trees/ Roses/ Grapes	2g of Agro-Vam per plant	Dip the plants damp roots into the Agro-Vam powder or sprinke powder onto the damp roots.
Root Dip	30g per L (2 tbsp per L)	Make a slurry of Agro-Vam and water, then dip plants into the slurry before planting. Use remaining slurry as a soil drench during planting.
Potting Soil	10g per 25L of soil	In well mixed commerical applications, apply 10 to 50 spores per germinating plant.
Vegetables, including car- rots, capsicums, Tomatoes/ Strawberries	500g per 1000 small plants	Water into freshly transplanted small plants. For watering in applications suspend Agro-Vam powder in clean water and delivery evenly to each plant. Agitate suspension during application. Wash well into the soil.
Compost Tea	500g per 200L	Add Agro-Vam to Compost Tea prior to application. Repeat applications will improve root infection levels.

## ANALYSIS

ACTIVE	SPORES/GRAM
Glomus Intradices	100 spores + Propagules/Gram

## OTHER APPLICATION

Compatibility: **Do not mix** with other products, fertilizers or pesticides.

**SIZES** AgroVam is available in 500 grams
