APPLICATION

All AgroBest nutrition products should be applied in conjunction with a specific nutrition program recommended by an AgroBest consultant based on soil/sap analysis. To improve efficiency and compatibility add Agro Chelate at 1:1000 to the tank first. Avoid foliar application when ambient air temperature exceeds 35 degrees Celsius.

Use higher rates for ground and irrigation applications. Rates can vary depending on crop, soil type, nutrient deficiency etc. Trapeaze can be soil applied using an irrigation system via trickle, dripper or mini sprinkler. Trapeaze can also be foliar applied via boom spray, aerial or sprinkler. Use sufficient water to cover leaves and fruit.
