FLOWERING			○		○		
FRUIT SET				○	○	○	
FRUIT BULKING			○		○	○ ○	
4 WKS PRE HARVEST (FINISHING)					○		○ ○
POST HARVEST	○						

- Shows application of product and timing
- ○ Shows two applications of product during this growth period.

NOTES

- Tissue analysis should be sought to monitor nutrient status of Custard Apples
- Magnesium should be monitored through tissue analysis and treated with Agrodex Mg or Dolomite if required.
- Adjust NPK rates according to plant vigor and results of analysis.
- Adjust K rates according to crop load

This program is designed to augment a soil fertility program and is offered as a guide only and dependant on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Tissue analysis should be sought to monitor nutrient status.
