NOTES

- Apply Super Seedtreat with seed pre planting or in seed box.
- Monitor nutrient status through tissue analysis and adjust timing and application of plant foods accordingly.
- Adjust NPK rates according to plant vigor and seasonal conditions.
- For processing corn varieties, AgroDEX K35 will greatly enhance the colour of the grain.

This program is designed to augment a soil fertility program and is offered as a guide only and dependant on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Tissue analysis should be sought to monitor nutrient status.
