FINISHING (COLOUR)							○

- Shows application of product and timing
- Shows two applications of product during this growth period.

NOTES

- Use NPK 11-6-9 earlier and 3-10-15 later in season for a balanced foliar spray with Trace Elements.
- Monitor nutrient status through tissue analysis, and adjust timing and application of plant foods accordingly.
- Agrodex CaB is applied as a foliar spray and if calcium is used through irrigation Carbo Cal at the rate of 10L/Ha is the preferred product.
- Agrodex K35 - Apply 3 weeks before harvest then every 7 days.

This program is designed to augment a soil fertility program and is offered as a guide only and dependant on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Tissue analysis should be sought to monitor nutrient status.
