- Shows application of product and timing
- ○ Shows two applications of product during this growth period.

NOTES

- Above rates are for foliar application with the exception of Revitalize.
- Alternatively, above products can be applied through fertigation (exceptions: Agrodex K35 & Fulfil)
- Tissue analysis should be sought to monitor nutrient status of Coffee (Option).
- Adjust NPK rates according to plant vigor and results of analysis.
- Adjust K rates according to crop load.

This program is designed to augment a soil fertility program and is offered as a guide only and dependant on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Monitor nutrient status through tissue and soil analysis.
