

FISH EMULSION

DESCRIPTION

Fish Emulsion's natural ingredients provide an organic concentration of N.P.K. and essential trace elements. These nutrients are readily absorbed and utilised by plants in foliar and soil applications. Fish Emulsion will improve soil fertility by stimulating the activity of soil micro-organisms, making more nutrients and range of natural minerals available to the plant. Fish Emulsion is an ideal boost for all trees and plants to increase plant health and vitality.

PRODUCT FEATURES

- Fish Emulsion has no non-organic inputs and can be applied by fertigation or foliar spray.
- Fish Emulsion will not harm trees, delicate plants or seedlings when diluted correctly.
- Fish Emulsion can also be used without hazard to persons, livestock, domestic or wild animals.
- This product is filtered to 100 microns.

FUNCTION

Fish Emulsion provides a totally organic concentration of NPK, trace elements, proteins and amino acids. Fish Emulsion stimulates macro and micro-organisms in the soil.
