The AgroBest Organic Grape program combines Revitalize, which is a microbial soil activator with other organic products.

Fish Emulsion is used to provide basic nutrition and FulFil to stimulate flowering and fruit set. CarboCal is an organically registered product for supply of Calcium. The product is a unique blend of Calcium with a wide range of organic and amino acids. CarboCal can be applied either as a foliar spray or through irrigation to the root zone. CarboCal can assist with cell wall strength and disease control.

#### **NOTES**

- Use tissue analysis to monitor nutrient status of vines.
- Additional organic sources of major nutrients may be required i.e., compost, manure.
- Use Extra Cal if under high disease pressure at 10L/ha
- Fulfil must be applied in two applications at correct timing. Three may improve results.

This program is designed to augment a soil fertility program and is offered as a guide only and dependent on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Monitor nutrient status through tissue and soil analysis.
