In the AgroBest Stonefruit nutritional program, a cost effective combination of micronutrients, trace elements and NPK plant foods are used to ensure flowering, fruit set, yield and quality.

NPK levels are controlled to accommodate various growth stages. The program also includes FulFil, a unique formulation of natural growth promotants which, has proven to substantially increase flowering and fruit set. Frequent applications of Calcium are recommended to maintain yield potential and quality. We recommend AgroDex Ca Plus Boron for high uptake foliar Calcium in early stages. The product has Boron and Nitrogen for increased efficiency.

For later growth stages, we recommend CarboCal, which is unique calcium fertiliser free of nitrates and chlorides. To ripen and fill the crop we also recommend AgroDex K35. AgroDex K35 is the ideal product for application at this time as it contains no chloride or nitrate which, can result in late leaf flush. K35 also contains natural plant regulators and organic acids to assist with improved yield.

NOTES

- Use further application of Agrodex Zn depending on Zinc levels.
- Use Fulfil for better flowering and set.
- Beyond Foliar 3-10-15 builds up tree/vine to give stronger healthier growth next season with more even flowering and higher retention of fruit.
- Use Spraytech Oil Multi Purpose Spray Adjuvant to enhance the application of AgroBest's products. Refer to Spraytech Oil label for rates.
- Use Agrodex CaB as foliar or Carbo Cal as foliar/fertigation
- To improve nutrient uptake use Calmate at 10L/Ha when applying any fertilizer through irrigation - recommend 3 applications/season.

This program is designed to augment a soil fertility program and is offered as a guide only and dependent on growing conditions i.e. soil, climate, disease etc. Observe correct spray procedures as factors such as temperature, humidity, water rates can effect results. Always check compatibility before mixing products. Grower assumes all responsibility. Monitor nutrient status through tissue and soil analysis.
