

# PHOZSTART ZZ

## DESCRIPTION

Phozstart ZZ is a premium liquid fertiliser formulated to supply crops with readily available nitrogen, phosphorus, potassium and zinc when planting. A cost effective, stable liquid formulation.

## PRODUCT FEATURES

- Cost effective stable liquid formulation.
- Fully plant available and water soluble NPK and Zn that are not bound up in the soil.
- Can distribute nutrient more evenly than granular fertiliser, especially when low rates are used.
- Can be applied at sowing in furrow or side dress, or through fertigation systems after planting.
- Organic bio stimulant for improved root development & microbial activity.

## APPLICATION RATES

USE	Rate/Ha	Water	Application
Cotton Wheat	5 - 12 L	1: 10 - 20	Apply in seed row as a "pop - up" fertiliser with water injection.
Maize Sorghum	3 - 8 L		Apply in seed row as a "pop - up" fertiliser, or into the soil at sowing, with water injection.
All Broadacre Crops	4 - 8 L	1:20	Apply as a foliar at early tillering Use lower rate for aerial application.

## APPLICATION

- Injected into the soil at sowing
- Sprayed directly on to the soil at sowing or later as side dress.
- Fertigated through irrigation systems
- Applied as foliar sprays
- Best applied in temperatures between 5 –25 C.

## ANALYSIS

ANALYSIS	%w/v Aust.	%w/w Int.
Nitrogen	5	3.52
Phosphorus	22	35.5*
Potassium	6	5.09*
Zinc	5	3.52
Organic Catalyst	10	7.04
*Expressed as P <sub>2</sub> O <sub>5</sub> & K <sub>2</sub> O		

## PRODUCT CHARACTERISTICS

<b>COLOUR</b>	<b>Dark brown solution</b>
<b>S.G.</b>	<b>1.42</b>
<b>pH</b>	<b>1.6 – 2.2</b>

## COMPATABILITY

This product may be mixed with some fertilizers and pesticides. Refer to AgroBest's compatibility chart for further information. A compatibility check prior to tank mixing is essential.

## SIZES

PhozStart ZZ available in these sizes: 200 Litre, 1000 Litre, Bulk Deliveries.
