

POPSTART PZ

DESCRIPTION

Popstart PZ is specifically formulated as a neutral pH pop-up starting fertiliser blend of nitrogen, phosphorus and potassium together with zinc to improve establishment and early growth of seedlings. Particularly beneficial in alkaline soils, Popstart PZ promotes establishment of a healthy plant and root system and nutrient uptake throughout the season giving increased production.

PRODUCT FEATURES

- Stable nitrogen and phosphorus stimulate root growth and early crop vigor.
- Better distribution of Phosphorus in the soil when comparing with dry fertilizer.
- Zinc for early crop development growth.
- Nitrogen, highly mobile in the plant is translocated and used in the growing tips

APPLICATION RATES

USE	LITRES/Ha	MINIMUM DILUTION	APPLICATION
Broadacre	Foliar: 5 - 7L Soil injection: 20 - 60L	1:10	If P is deficient, spray at the 3 - 4 leaf stage. Recommended to apply at planting via soil injection. Minimum water 50L/Ha
Horticulture crops	Foliar: 3 - 5L Fertigation: 5 - 10L	1:100	Apply as and when required
Citrus	Fertigation: 10 - 30L	1:100	Apply regularly to newly hardened spring flush or during active growth period and for alkaline soils, apply post harvest.
Nut Crops	Fertigation: 10 - 15L	1:100	Apply at early stages of growing season when adequate leaf cover is present. Apply post harvest
Vines	Fertigation: 10 - 15L	1:100	First application when shoots are 10cm long. Second application at 5% flowering
Avocados	Fertigation: 10 - 15L	1:100	Apply through soil to recently hardened spring flush and / or active growth periods. Also apply at post harvest
Potatoes	Fertigation: 10 - 20L	1:100	Apply regularly through soil after planting until canopy closure. Especially in high pH soils.

All AgroBest nutrition products should be applied in conjunction with a specific nutrition program developed by an AgroBest consultant based on a soil/sap analysis. Foliar applications should be avoided when ambient air temperatures exceeds 35 degrees Celsius. To improve efficiency and compatibility add AgroBest's Agro Chelate at 1:1000 to tank first. Use higher rates for ground/irrigation applications. Rates can vary depending on crop, soil type, nutrient deficiency etc. This product can be soil applied using an irrigation system via trickle, dripper or mini sprinkler. This product can also be foliar applied via boom spray, aerial or sprinkler with sufficient water to cover leaves and fruit.

ANALYSIS

ANALYSIS	%w/v Aust.	%w/w Int.
Nitrogen (n) as ammonium	9.3	7.15
Phosphorus (p) As water soluble	13.5	23.8*
Potassium	1.35	1.25*
Zinc (Zn) As EDTA	0.9	0.7
*Expressed as P ₂ O ₅ & K ₂ O		

PRODUCT CHARACTERISTICS

COLOUR	Clear Green
S.G.	1.3
pH	6.0 - 6.8

COMPATABILITY

This product may be compatible with some fertilizers and pesticides. Refer to AgroBest's compatibility chart for further information. A compatibility check prior to tank mixing is essential.

SIZES

POPSTART PZ is available in these sizes: 20Lt, 200 Lt, 1000 L and Bulk Deliveries.
